COVID-19

Isolation Following a Positive COVID-19 Test

Yes ← **Have you tested positive for COVID-19?** → **No**

Isolate for 5 days from when symptoms developed (5 days from positive result if asymptomatic) then take a rapid (antigen) test on 5th day

See Quarantine Following Close Contact flow chart if necessary

Positive Result ← **Was your rapid test positive for COVID-19?** → **Negative Result**

Continue to isolate until you have a negative test result or until 5 additional days have passed

Negative test or 10 days of isolation

No ← **Have you been fever-free for at least 24 hours without fever-reducing medication AND have other symptoms improved?** → **Yes**

Continue to isolate until fever-free for at least 24 hours and other symptoms have improved

Submit a COVID-19 RTW Form. You may return after the form is approved. You must wear a mask while at work for 10 days after positive test (if asymptomatic) or first symptoms. This mask requirement is in addition to other MTS facial covering guidance
